**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on April 10, 2006 has been entered.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Caenen et al. (FR 2,718,635).

Caenen et al. disclose an intervertebral disc prosthesis including: two cover plates (1, 2) and a prosthesis core 3 connected to cover plate 2 by connection profiles undercut in a complementary manner wherein the connection profiles include at least a pair of substantially straight profile sections disposed symmetrically with respect to an anterior-posterior direction of the prosthesis and are arranged to meet at an angle so that an angle included between the straight profile sections is not greater than 150 degrees (Figs. 4, 5 and 8 and pages 5-9 of the attached translation). See marked up Figure 4 on the following page.

It is noted that Applicant is only claiming that the substantially straight profile sections meet and that an angle included between the substantially straight profile sections is not greater than 150 degrees. Applicant is not claiming that the straight profile sections meet at an angle not greater than 150 degrees.

Thus, one could pick substantially straight sections, i.e., largely but not wholly straight sections, of the connection profiles of the Caenen et al. prosthesis such that an included angle is not greater than 150 degrees.

### *Response to Arguments*

Applicant's arguments submitted under "REMARKS" in the response filed on April 10, 2006, regarding the rejections of amended claims 1, 3 and 4, as being anticipated by Marnay have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground of rejection is made in view of Caenen et al. (FR 2,718,635). A copy of the translation used by the Examiner is attached to this office action.

### *Conclusion*

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
